1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 14, line 27, "outputs" was changed to -- parameters -- to provide internal consistency for claim terms.

In claim 21, line 2, "temperature" was changed to -- temperatures -- to correct a grammatical error.

2. The following is an examiner's statement of reasons for allowance: Applicant cites several references related to measurement of analyte concentrations. Of particular relevance, Oosta et al. (USPN 5,725,480) teach use of temperature measurements, among other factors, to calibrate optical glucose measurements based upon a subject's skin type. Cho (WO 01/28414) suggests determining glucose concentrations based upon analysis of temperature and spectral measurements. However, the prior art does not teach or suggest a blood sugar level measuring apparatus that includes a measuring arrangement that obtains a plurality of temperatures from a subject's body surface, a computing unit for converting measurement values provided from the temperature measurements and oxygen volume measurements into parameters which are used for computing a blood sugar level based on a stored relationship, and further including either a 1) heat transfer prevention

means, 2) a heat-conducting member disposed in contact with a body-surface contact unit and a heat insulator disposed in contact with the heat-conducting member, 3) a supporting column member which supports a heat-conducting member and has a smaller diameter at a site adjacent to the heat-conducting member than the maximum diameter of the supporting column member, or 4) a heat transfer prevention material for preventing heat transfer to a blood flow volume measuring unit from the vicinity thereof, in combination with the other claimed elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
